

I claim:

1. A cable railroad system, comprising:

a load-bearing and traction cable;

a plurality of chairs mounted to coupling devices for selectively coupling said chairs to said load-bearing and traction cable;

said chairs having seats with electric heating devices, batteries connected to supply said heating devices with energy; and

devices for charging said batteries.

2. The cable railroad system according to claim 1, which further comprises control devices for controlling a heating of said seats.

3. The cable railroad system according to claim 2, wherein said control devices are disposed on said chairs.

4. The cable railroad system according to claim 1, which further comprises busbars disposed in stations of the cable railroad system and configured to charge said batteries during a garaging of said chairs.

5. The cable railroad system according to claim 1, which further comprises busbars disposed in stations of the cable railroad system and configured to charge said batteries during a movement of said chairs through the stations.

6. The cable railroad system according to claim 1, which comprises photovoltaic elements mounted to said chairs for charging up said batteries.
